EGON SZABÓ

SOFTWARE DEVELOPER

HELLO@EGON.ZIP BUDAPEST, HUNGARY

I am a software developer with a cybersecurity mindset. I create premium, exclusive, cinematic and immersive websites and web applications. I use AI-assisted workflows and understand the structure of existing code. I also create system diagrams, technical plans and implementation steps. My particular interests are cybersecurity, cryptography and digital forensics. I work most effectively independently and am reliable with repetitive tasks.

EXPERIENCE

VRX IT SERVICES KFT.

DEC 2025 – JUN 2026

Technical designer and web developer · Remote

- Designed websites and digital solutions for residential buildings and business clients.
- Created premium, exclusive and visually refined web interfaces.
- Built the redesigned user interface for Eredeti Sudoku.
- Developed web projects for Faedra Group, RE/MAX, Irodakereso.hu and other business clients.

INDEPENDENT WEB PROJECTS

2021 – PRESENT

Websites, web applications and technical planning

- Plan and build projects using Next.js, React, Vite and Svelte through AI-assisted workflows.
- Map systems, features and security considerations before implementation.
- Create high-end digital experiences with thoughtfully designed user interfaces.
